

SUMMARY

Kenny & Co heavy duty feeder box / feeder hopper conveyors are designed for bulk waste material.

Large tonnage of waste material is feed into the feeder box / feeder hopper which evenly moves material to the material recovery facility.

Kenny & co systems are modular designs and can be extended or shortened when required.

Feed hoppers are used in the waste reception area to feed material through the recycling plant for further recycling.

Kenny & Co can offer a wide range of desgins and options which are all robust in design to accommodate every thing from C&D , C&I, MSW.

- Easy Maintenance
- Easy efficient replacement of rollers
- Belt adjustment and belt scrapper
- Belt guards, rollers guards for easy access for maintenance and cleaning.
